SHELL CALIF. PROD. INC. - PROJECT REVIEW

On Dec. 2, 1982, Hal Bopp and David Mitchell met with Don Knowles and two area engineers to review Shell's water disposal project in the Vedder-Walker Zones in Round Mountain field. There are no plans to alter the two-well project at present but the company was notified that, should U.I.C. exemption not be given to the Walker Zone, mandatory plug-backs on these two wells may be required.
